WHERE IT SITS

FEELS

THE IDEA

The page is the canvas and the margin is where thought accumulates: one permanent rule in ink is the coordinate, and small green annotations appear where something new lands — Newsreader for the words, Instrument Sans for the chrome, warm paper for both. The margin is permanent; the green mark is the act of adding.

ONE LOUD THING

The green annotation tick is transient — it appears where thought lands; the margin never moves.

WHERE IT DIFFERS

The measured shelf is cool or achromatic tools; nobody owns an editorial margin system where permanent structure and the act of adding are two colours.

THE MARK

The margin rule with three annotations: a coordinate, not a container — the place where the reading and the thinking happen.

Logo

The symbol + wordmark is the primary logo. Use it wherever the space allows; every other version is derived from it.

CLEAR SPACE

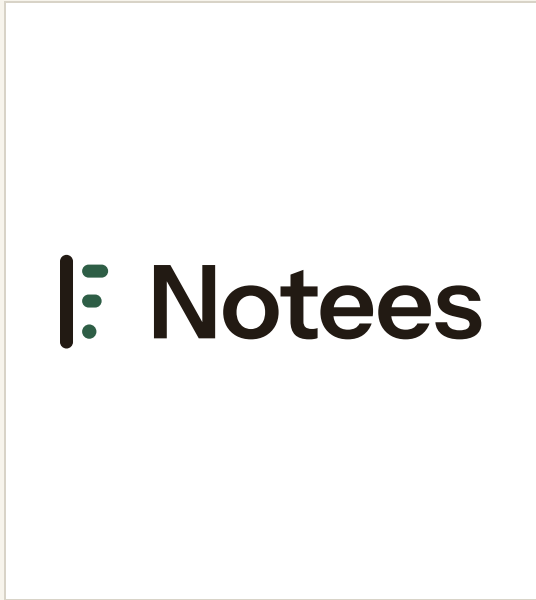

Keep at least $x = 1 \times$ the wordmark's cap height free on every side. (inferred from the drawing; confirm before print)

- Use the supplied files in kit/logo; never retype or redraw the wordmark.
- Scale proportionally, from the corner.
- The guide lines show the cap height and baseline the lockup is aligned on.

Pick the version by the space, not by taste. When the primary logo would render smaller than 16 px tall, switch to the symbol.

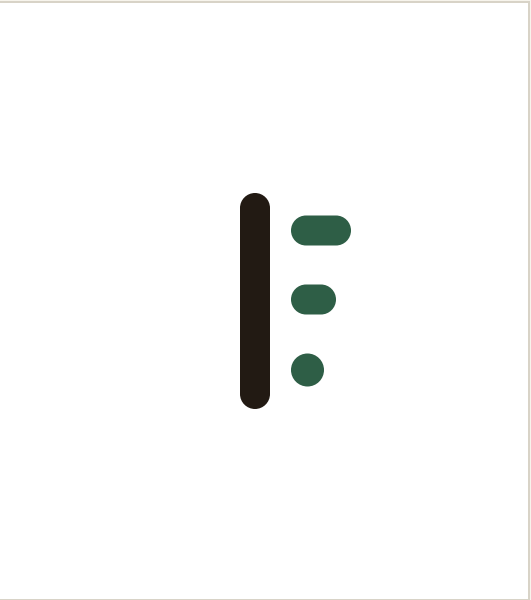

Logo

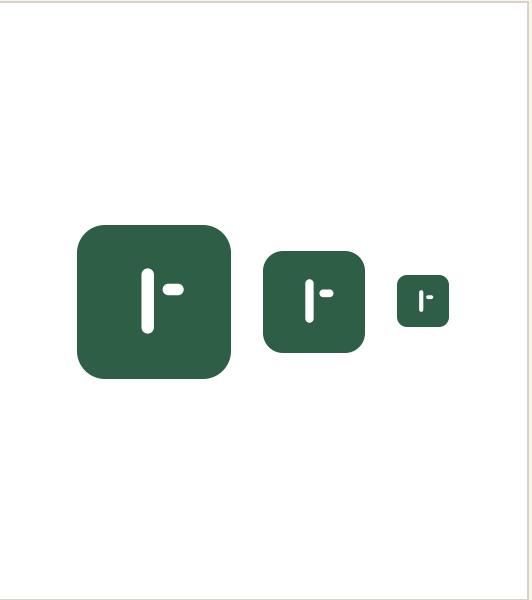

Primary
Horizontal lockup. The default for headers, documents and signage.

Stacked
For square and narrow spaces where the horizontal lockup gets too small.

Symbol
On its own only where the brand is already named nearby: avatars, app icons.

Favicon
The symbol on the primary colour at 48, 32 and 16 px.

Every logo part keeps at least 3:1 against its ground.
Where the colours cannot, the logo switches to one colour.

Annotations live in the margin – never off the page

The margin is vertical – never lay the rule down as a divider

Don't stretch

Don't recolour

Don't rearrange the symbol and the name

Warm paper, iron ink, green annotations in the margin – the margin is permanent, the green is the act of adding.

Colours

Band heights show how much of each colour a typical page uses. Large areas take the ground and primary; the accent stays small.

PRINT

Screen values are exact. For print, ask your printer for CMYK/Pantone matches made with their profile; the Lab D50 values are the reference to match against.

TINTS

80, 50 and 20% for charts and backgrounds only, never for text.

Everything is a node.

Headlines start on column 1; body copy runs 5 to 7 columns wide. Big titles may hang into the margin by their side bearing only.

In dark mode the ground is #161412; text and the primary move to their dark-mode steps. The logo uses the one-colour light version.

Dark mode

Body text needs 4.5:1, large text and logo parts 3:1 (WCAG 2.2). Every pair shown here is measured from the palette.

Icons

- 24 px grid, 2 px padding, 1.75 px stroke.
- Round caps and joins; no fills except for a selected state.
- Icons take the ink or primary colour, never the accent.
- Sample set shown in the system style; draw new icons to match.

Imagery

- Real people, real places; natural light.
- Duotone in the primary and ink for backgrounds behind text.
- The accent appears in pictures only where it already exists in the scene.
- No stock clichés: no handshakes, no glowing orbs.
